

LaRonde

**GUEST
ACCESSIBILITY
GUIDE**

WELCOME TO LA RONDE

We are glad you are here! At La Ronde we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment and we want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Relations. If you feel that you or a member of your party may be affected by this

policy, you are encouraged to visit Guest Relations to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our associates to help accommodate you.

RIDE SAFELY

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and ensure to follow all instructions provided.

In general, all Guests should be in good health and free from any conditions known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Relations. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE**.

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this guide and all

instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper rider positioning until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. La Ronde is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone or electronic usage while riding is prohibited.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in La Ronde.

RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each

ride. The intent is to provide a scale to guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY		DESCRIPTION
Low Thrill Rides		Rides that are generally calm and gentle in nature.
Mild Thrill Rides		Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides		Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides		Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction and/or elevation.
Aggressive Thrill Rides		Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction and/or elevation.

KEY TO SYMBOLS

These symbols along with the ride ratings are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by supervising companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where Riders may remain in their wheelchair. La Ronde does not currently possess any rides that permit this.

This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. La Ronde uses the following terms:

Ability to brace: Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Hand-held infants: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Grande Roue and Carrousel in a Chariot.

A Supervising Companion is someone who meets all the requirements to ride the ride

themselves, who is at least 54" in height, and demonstrates appropriate observed behavior. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against 5 primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a rider restriction. Please

closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride Le Grand Carousel.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction. Guests may be “officially” measured at the main entrance’s Guest Relations office. The measured Guest will be given a wristband to indicate their height range. Wristbands are not required to ride. They are intended to make your wait in line shorter by streamlining the Guest height measurement process.

To accurately measure Guests, a height measuring device may be used during the height measuring process. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, a shoe which does not contribute excessively to the Guest's height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. La Ronde reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Relations office upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Associate will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request helpful accommodations are encouraged to obtain the CAL card by registering at <https://www.carteloisir.ca/en/>. The registration process requires the information listed below be uploaded into a secure online portal. Once a Guest has filled out the online application and uploaded necessary documentation, they will receive their Accessibility Card. Guests will present the CAL Accessibility Card to the Guest Relations at the park to receive any necessary accommodations.

Note: Only CAL can issue the CAL Accessibility Card, and not La Ronde.

CASTS & BRACES

Guests with casts and braces will be restricted from riding rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full

arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on [most/the] slides at La Ronde.

The following chart displays the cast and brace rules for all rides and attractions.

- C** Must ride in a chariot
F Cast/Brace must fit safely in the ride unit
O Not Permitted to participate on elevated activity area
Y May ride with the condition
Z Participation or water depth may be restricted if necessary

PROSTHETICS

Guests with any type of prosthesis should not ride **Autos Tamponneuses, Chaos, Demon, Dragon, Ednor, Titan, Vol Ultime**, unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with prosthetics are advised to consult with the La Ronde Supervisory Team for guidance during their visit.

For certain rides, manufacturers may require documentation from the prosthetic device's manufacturer confirming it is designed to withstand high-speed roller coaster forces of up to 68 mph and G-forces between 1 to 5 Gs, with sufficient safety measures in place.

Additional lists are available for:

- Rides where prosthetics are not permitted or have specific limitations

-Autos Tamponneuses, Chaos, Demon, Dragon, Ednor, Titan, Vol Ultime (Arms or Legs)

-Boomerang (Arm)

-Goliath, Slingshot, Vampire (Leg)

RIDE DEVICES

Guests with disabilities may be eligible to ride select attractions using a body harness provided by the park. Guests should visit designated park locations for assistance and to determine eligibility.

For safety reasons, certain attractions may **require the removal of medical devices** or prosthetics that are not securely fastened to the rider's body. These devices may interfere with

safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Additional lists are available for Body Harnesses.

- Body Harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: Vampire and Goliath.

For additional guidance, Guests are encouraged to consult the park guide or speak with a Ride Attendant or Guest Relations team member.

ADDITIONAL INFORMATION

Our goal is to make La Ronde as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Family Services

A space for nursing mothers is available at First Aid Center. Baby changing areas and a companion restroom can be found in most restrooms. Please feel free to ask a Team Member for directions to these locations or review a park map.

First Aid

Our First Aid Center located behind our Mucho Nacho restaurant is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid.

Parking

Accessible parking is available on a first-come, first-serve basis within the main parking lots of the park. When you arrive at the parking toll booths, ask a Team Member for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask a Team Member for directions to additional parking areas.

Personal Care Giver

A Personal Care Giver is a guest who visits La Ronde working in the capacity of a paid, formal, personal caregiver. A personal caregiver must be employed by an agency, group, or a family, and must be licensed or as described by local jurisdiction having authority. A family member must meet the employment qualifications and provide acceptable documentation of a personal caregiver. To qualify for complimentary admission, the personal caregiver must initially provide acceptable documentation at Guest Services. If approved, the caregiver will be given a complimentary admission product that does not exceed the product held by the guest in need of care - this includes Season, or Gold, but not Prestige Passes. All available season pass add-on products may be purchased and added to the personal caregiver season pass.

Printed Guides

Print versions of the Park Guide and Guest Assistance Guide are available at Guest

Services Large print versions are also available. There are a limited number of print guides which are obtainable on a first-come, first-served basis.

Quiet Area

La Ronde offers a Quiet Area located near the Pizza Ronde of the main entrance for family members or caregivers to take a break and reduce sensory stimulation.

Restrooms

Private restroom facilities for Guests needing the assistance of a Companion are available at Oasis close to our Goliath. Wheelchair accessible stalls are located at all restrooms except the Saloon. For your convenience we also have a family restroom available the Big Arcade in the main alley.

Rider Swap

The Rider Swap program allows one adult to stay with non-riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services near the main entrance.

Service Animals

Service animals are welcome at La Ronde. A service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose

sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be house broken, controlled with a restraining device, display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or Team Member will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on the Grand Carrousel and Air Papillon. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at the Rimbambelle Scene and the Place d'Animation. They are permitted to walk through the park areas, including scare zones. Visit Guest Services for more information. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information

A Service Animal "Relief Area" is located in the grassy area next to Pizza Ronde close to the main entrance. Owners are responsible for disposing of their animal's waste.

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles

A limited supply of wheelchairs and strollers are available for rent at the Locker Rental of the main entrance. However, since wheelchairs, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own.

Guests Using Wheelchairs and ECV's

Guests who choose to use a wheelchair or ECV, we require a safe speed be maintained while traveling in the park. Wheelchairs and ECV's cannot be accommodated on our rides and attractions.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Services. La Ronde personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

Guests may re-charge their wheelchair battery at the locker rental of the main entrance.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Our larger Guests may experience difficulty on our Roller Coasters (Goliath, Boomerang, Ednor, Monster) and in most rides of the Dino Parc and Ribambelle (Kid's area).

Maximum [*and minimum*] weight limits can be found under the individual rides in this guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrance(s) of: Goliath

The manufacturer requires a maximum Guest height on the following rides: Boomerang 80', Demon 76', Ednor 78', La Danse des Bestioles 54', Ourson Fripon 54', Splash 75',

LOOSE ARTICLES

Most rides cannot accommodate loose articles including jewelry, cell phones, hats, cameras, purses, backpacks, basketballs, umbrellas, beverage containers, electronic devices, etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. La Ronde is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The

restraint mechanism must be secured snugly against the Rider's body.

For safety reasons, cell phone usage, taking pictures and filming on rides are prohibited.

Glasses must be secured on all rides. On Catapulte, Démon, Orbite Slingshot, Splash, glasses must be secured by an athletic strap or they cannot be worn on the ride.

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an Associate for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at La Ronde are turned in to First Aid Center. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible. Lost articles may be reported via the internet at

<https://www.chargerback.com/ReportLostItemCBEmbed.asp?CustomerID=15900&languagecode=fr>

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Magnetics are used at the following attractions: Autos Tamponneuses, Boomerang, Goliath et Slingshot. Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, Portable Oxygen Tanks are not permitted at La Ronde. For your convenience, the park's First Aid station(s) will be able to appropriately store your additional oxygen tanks during your visit.

Many rides can accommodate smaller Personal Oxygen Equipment. Personal Oxygen Equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including but not limited to: haze and other atmospheric effects, scents, areas of low lighting, loud music, sound effects, strobe lighting and other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions. Attractions utilizing these effects include: Dragon and all of our Fright Fest scare zones.

PROPER ATTIRE

For the safety and enjoyment of our guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. On all roller coasters scarves will be required to be

removed in their entirety. Loose fitting shoes may only be removed before riding Catapulte, Ednor, Monsieur l'Arbre, Orbite, Slingshot, Titan, Tour de Ville, Vampire, Vertigo,

Swimwear is not permitted on the park.

Additionally, jewelry, such as necklaces, bracelets, dangling earrings and rings (except wedding bands) are prohibited on Auto Tamponneuses.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural.

The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.

The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to hold on with two functioning arms.

Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with one functioning leg.

Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Ability to brace self with two functioning legs.

Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prosthetics.

Minimum of two functioning extremities.

Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.

Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.

Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our Associates and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behavior:

Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

RIDES

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

Air Papillon 2

Guests must be 36" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted. Maximum Weight - 440 lb. per row
Bus with six rows that seats four guests per row. The bus rotates both in a clockwise and counter-

clockwise direction reaching a height of over 20 feet.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria : Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar or neck brace not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat.

Aquatwist 1

Guests must be 48" tall to ride alone or 36" tall with a supervising companion. Hand-held infants are not permitted to ride

Max Weight- 992 lbs per unit

The Twist & Splash boats are floating free on the water and turning on their own axes. The 6-seater boats are provided with manually operated water cannons. The movement of the boats is known from the traditional Tea Cup Ride. The non-riders around the ride can also join the "splash party" by using the off-board water cannons around the ride.

Restraint System: A door with a safety lock secures all Riders in a cabin.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have sufficient upper extremities to maintain the proper riding position. Guests with a cervical collar, neck

brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

Autos Tamponneuses **2**

Guest must be 44" tall to ride

Max Weight - 275 lbs per car

A bumper car ride where Riders drive cars around. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual shoulder strap is positioned across the chest and under the arm of each Rider.

Rider Criteria: Guests must have two functioning arms and two functioning legs. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Casts are not permitted on this ride. Leg prosthesis are not permitted on this ride. Guests should check with Guest Services to determine if they are eligible to ride without the prosthetic.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: This ride utilizes magnetic systems during the ride.

Bateau Pirate

Guests must be 48" tall to ride alone OR 39" tall and accompanied by a Supervising Companion. A swinging ship that produces a feeling of weightlessness as it swings back and forth.

Restraint System: A shared lap bar secures all Riders in the row. Riders between 39" and 48" tall must be seated in the center two rows of the ship and sit towards the middle of the row with their Supervising Companion.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Boomerang

Guests must be 48" tall to ride and not be taller than 80" tall.

A high-speed, looping roller coaster which turns Riders upside down multiple times forward, and then again while traveling backward. Riders will experience weightlessness and rapid movements from side-to-side.

Restraint System: A shoulder harness secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the Guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Catapulte 

*Guests must be 42" tall to ride
Maximum Weight - 850 lb. per flight*

La Catapulte is a high-thrill Skycoaster attraction made to simulate flight. Riders are hoisted 174 feet into the air. They control their own ride experience by pulling the ripcord, initiating their tethered freefall descent and flight. The sensation of flight as Riders fall is similar to skydiving and hang gliding, with Riders reaching speeds up to 70 miles per hour.

Restraint System: Riders wear a full body harness that supports the Rider in a prone position. The harness is connected to the flight support cables.

Rider Criteria: Guests are required to have a minimum of one functioning leg and by reason of the restraint system inherent in the flight suit, it is

necessary that the Rider possesses two arms sufficient for proper functioning of the flight suit be maintained. Lower extremities must be of sufficient enough length to be contained and restrained by a leg strap. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access available via the ride entrance. Riders must be able to walk independently or be assisted by a member of their party.

NOTE: This is an extra charge attraction.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

Chaos

Guests must be 48" tall to ride

This ride is a compact roller coaster type ride on a circular track that is positioned vertically. The ride moves in a pendulum style resulting in up to 10 upside down loops.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have two functioning arms and two functioning legs. Two functioning arms are sufficient if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Casts are not permitted on this ride. Prosthesis are not permitted on the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and

over the side of the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Note : Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands of Riders while riding.

Condor

Guests must be 55" tall to ride alone or 39" tall and accompanied by a Supervising Companion One Adult/ Bird

A moderate ride that spins and tilts to the top of an elevated tower

Restraint System: A individual seatbelt secures each Rider across the thighs and pelvis. A door encloses the ride unit in the front row. The smaller Rider must sit ahead of the larger Rider within the seat.

Rider Criteria: Guests must have a minimum of two functioning extremities. Must have the ability to hold on with one functioning arm and have the ability to brace self with one functioning leg. Guests with a cervical collar, neck brace, broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat.

Démon

Guests must be 54" tall to ride

An inverting thrill ride where units rotate on a 360 degree axis while spinning to a maximum height

of 64 feet around the center hub. Riders will experience weightlessness, strong side-to-side movement, and rapidly changing forces and directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with cervical collar, neck brace or broken collar bone are not permitted to ride.

Guests with any type of prosthesis are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Disco Ronde

Guests must be 52" tall to ride alone or 44" tall to ride with a supervising companion

This is a circular ride where units pivot by centrifugal force created by the ride's rotating table.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion. Please use caution, as the ride unit may shift when entering and exiting.

Dragon 

Guests must be 52" tall to ride alone OR 42" tall and accompanied by a Supervising Companion.

An indoor junior steel roller coaster with mild drops, bumps, and turns. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar or neck brace are not permitted to participate on the elevated activity areas of this attraction.

Prosthesis are not permitted on this ride. Guests should check with Guest Services to determine if they are eligible to ride without the prosthetic.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride contains strobe lighting.

Guests must be between 52" tall and 78" tall to ride.

A high speed suspended steel roller coaster which turns Riders upside down five times. Riders will experience weightlessness and rapid movement from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities that includes one functioning arm. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest is able to form a saddle posture with leg residual limbs sufficient to brace self upright in the seat against the shoulder harness. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride. Leg and/or foot prosthesis are not permitted on this ride. Guests with any prosthesis must consult with Guest Relations or speak with a Ride Operations Supervisor prior to waiting in line or riding.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Goliath

Guests must be 54" tall to ride

A high-speed steel roller coaster with a combination of banked turns and airtime hills.

Restraint System: An individual lap bar secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to ensure proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three extremities; one functioning arm that includes a hand and two legs that include a foot. Due to manufacturer requirements, a prosthetic leg is not a substitute for a leg amputation. Two functioning arms including hands are sufficient instead of two legs with feet as long as the amputation is below the ankle. The required lower extremities may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

WARNING: This ride utilizes magnetic systems during the ride.

Grand Carrousel 1

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants must ride in a chariot. Maximum weight-170 lb. per animal, and 680 lb. per chariot.

A carousel ride which features animals--both stationary and moving up and down--and chariot seating mounted on a circular platform that rotates.

Rider Criteria: Guests must have the ability to straddle the ride unit. Guests unable to straddle the ride unit must be seated in a chariot unit. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot. Riders with a full leg cast must be seated in a chariot.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, are permitted to ride on the ride platform or chariots.

Grande Roue 1

Guests must be 52" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants OR single Riders are not permitted.

Maximum Weight – 990 lb. per gondola

A ferris wheel ride where guests ride in gondolas suspended from the outer rim of the wheel.

Riders will experience changes in direction and elevation.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

La Danse des Bestioles 1

Guests must be between 36" and 54" tall to ride
A slow moving unit (Butterfly or caterpillar) that goes up and down as the ride rotates around in a circle. Riders can use a joystick to control the elevation of their unit.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit.

La Grande Envolée 1

Guests must be 36" tall to ride alone or accompanied by a Supervising Companion. Hand-held infants are not permitted.

This ride only accommodates one adult per balloon.

A hot air balloon ride that spins and raises Riders in the air.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be below the knee. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

La Marche du Mille-Pattes 2

Guests must be 42" tall to ride alone OR 36" tall and accompanied by a Supervising Companion.

A junior steel roller coaster with mild drops, bumps, and turns. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Le Monstre

Guests must be 48" tall to ride

A high speed wooden roller coaster with a combination of banked turns and airtime bumps.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Le Safari 1

Guests must be 40" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

This is a slow moving miniature train ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Les Explorateurs 2

Guests must be 48" tall to ride alone or ride with a supervising companion. Hand-held infants are not permitted.

A children's circular boat ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping down into the ride unit. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

Manitou 

Guest must be 57" tall to ride.

A disc type ride that swings up and down and rotates on itself until it reaches a speed of 18 revolutions per minute. Guest will experience a feeling of weightlessness

Restraint System: A shoulder harness with safety belt secures each Rider over the head and across the chest.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace or broken collar bone are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

Le Marais Enchanté ²

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum of 1 adult per row.

This spinning tugboat ride which travels back and forth over an upward, curved track.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Monsieur L'Arbre ²

Guests must be 36" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight - 275 lb. per swing.

This ride only accommodates one adult per swing.

Chair swing children's ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row with an individual between-the-legs safety belt.

Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

Orbite 

Guests must be 52" tall to ride.

A tower ride with a chair lift-type seat where Riders are propelled up or shot down at high speeds. Guests will experience the feeling of weightlessness and elevation change as they ascend and descend each ride tower.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have at least one functioning arm and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

NOTE: Glasses may only be worn on this attraction if they are secured with an athletic strap. Glasses may not be held in the hands while riding.

Ourson Fripon 2

Guests must be between 36" and 54" tall to ride.

This is a family tower ride where Riders are propelled to the top and bounce down to the platform. Riders will experience weightlessness and rapidly changing forces and directions.

Restraint System: A shared lap bar is positioned above the laps of all Riders in the row with an individual between-the-legs safety belt. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Guests with a cervical collar, neck brace, broken collar bone, braced arm cast, or full leg cast are not permitted to ride.

Guests with any type of prosthesis should not ride unless they can ensure the device is properly secured and will remain in place during the ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several

steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Pheonix

Guests must be 44" tall to ride alone OR 36" tall and accompanied by a Supervising Companion. Maximum Weight - 340 lb. per car.

Riders ride in suspended cars that rotate in a circle. Once the ride's speed increases, Riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests must have a minimum of one full functioning leg (including prosthesis) and one leg amputated below the knee. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Pommes d'Api ²

Guests must be 42" tall to ride alone OR accompanied by a Supervising Companion. Hand-held infants are not permitted. Maximum weight-550 lb. per balloon. This ride only accommodates two adults per balloon.

A tower with free hanging cabins suspended from an elevated, rotating pylon that rotates clock-wise as it climbs the tower for a great aerial view of the area.

Restraint System: An individual seatbelt secures Riders across the thighs and pelvis. A door further encloses the ride unit. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with cervical collar, neck brace or broken collar bone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

Slingshot

Guests must be 44" tall to ride. Minimum Weight - 110 lb. per launch. Single Riders are not permitted.

A two-person capsule that is attached to steel cables and propels Riders in the air. Riders will experience weightlessness, rapid movements from side-to-side, and rapidly changing forces/directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Two functioning arms are sufficient instead of one functioning arm and one functioning leg if the guest has a normal center of gravity and lower extremities are sufficiently strong to support weight against the restraint under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat.

NOTE: This is an extra charge attraction. \$

Splash 

Guest must be between 42" and 75" tall to ride
A water attraction with a single drop that will have the guest experience a feeling of weightlessness

Restraint System: A shared seatbelt secures riders in the row by groups of two across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace or broken collar bone are not permitted

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace and broken collarbone are not permitted to ride. Guest with a visual or hearing impairment must ride with a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Tour de Ville

Guests must be 48" tall to ride.
Chair swing ride with free hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of two functioning extremities; one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collar bone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up into the ride unit.

Tourbillon

Guests must be 46" tall to ride alone OR 36" tall and accompanied by a Supervising Companion. Hand-held infants are not permitted.

Maximum Weight - 800 lb. per car

This is a circular ride where cars pivot by centrifugal force created by the ride's rotating table.

Restraint System: A shared lap bar secures all Riders in the row. A safety belt further secures the lap bar. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Two functioning arms are sufficient instead of three functioning extremities if the guest has a normal center of gravity and lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Amputations must be at the knee or below. Guests with a cervical collar, neck brace, broken collar bone, or braced arm cast, are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Vampire

Guests must be 54" tall to ride.

A high-speed, inverted looping roller coaster which turns Riders upside down six times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three extremities; One functioning arm that includes a hand and two legs. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Legs may be paralyzed. Guests with a cervical collar, neck brace, or broken collar bone are not permitted on the ride. Casts are not permitted on this ride. Guests who do not have appropriate center of gravity must have sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prosthesis are not permitted.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into a suspended seat. Please do not use the ride restraints for support while entering and exiting, as they will shift.

Vertigo

Guests must be 48" tall to ride

A thrill ride that swings Riders upside down both forward and backward. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance which can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of three functioning extremities; one functioning arm and two functioning legs. Guest with a cervical collar, neck brace and broken collarbone are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion, and be capable of elevating themselves up into the seat. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

Vol Ultime

Guests must be 44" tall to ride

A chair swing thrill ride with free hanging seats suspended from an elevated and rotating gondola. Riders will rotate in a circular motion as the gondola ascends and descends the tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. An additional individual seatbelt is positioned across the chest and under the arms of each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size

Rider Criteria: Guests must have a minimum of four functioning extremities. Two functioning arms are sufficient if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Guests with a cervical collar, neck brace, full or braced arm cast are not permitted to ride. Amputations must be below the knee. Prosthetics are not permitted on the ride

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a companion and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting

ENTERTAINMENT VENUES

Due to the popularity of our shows, we suggest you arrive early as seating may be limited. Show schedules are available at Guest Services, on the La Ronde mobile app and at any theatre entrance. All Entertainment venues are accessible.

Scène de Ribambelle

The Scène de Ribambelle is an outdoor theatre featuring main stage show productions. There are viewing areas that accommodate wheelchairs and companions on the side of the theater.

Place d'Animation

The Place d'Animation is an outdoor scene featuring a main stage to present our fireworks shows. There are viewing areas that

accommodate wheelchairs and companions in the front rows.

FRIGHT FEST

Fright Fest at La Ronde has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters in our Fright Fest attractions will not touch you; please do not touch them in any manner. Guests that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Services for more information. Service animals are welcome to attend Fright Fest events. They are permitted to walk through the park areas, including scare zones. Please adhere to all posted and verbal warnings and directions.

BOO FEST

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Services.
