Entertainment Corporation

**GUEST
ACCESSIBILITY
GUIDE**

WELCOME TO SIX FLAGS AMERICA

We are glad you are here! At Six Flags America, we are proud to have earned one of the best safety records in the industry. We are committed to providing our Guests with a safe environment. We want our Guests to have a safe and enjoyable day. We are continually striving to improve our facilities.

Many amusement park rides incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience the ride. Guests of larger or smaller size, Guests who have a history of heart, back, or neck trouble, Guests who are pregnant, Guests who have had recent surgery, or Guests with casts, braces, restrictive devices, or disabilities may not be safely accommodated by these systems. For example, height requirements are based on the size needed for the safety restraints to function properly and the level of maturity usually associated with a certain height.

The Attraction Accessibility Program has been developed using our past experiences and our evaluation of each ride in both normal and emergency operating conditions. We also work closely with the manufacturer of each ride and our policies incorporate the manufacturers' guidelines as well as the requirements of the Americans with Disabilities Act. We hope that this Guide will help Guests make the best choices to ensure a safe and enjoyable experience at the park. Our goal is to safely and efficiently accommodate the needs of all Guests, including individuals with disabilities.

Our prime consideration is the ability of each person to endure the dynamics of a ride without risk of injury to that person or other Riders. If you have a suggestion for an improvement or have questions not answered in this brochure, please stop at Guest Relations. If you feel that you or a member of your party may be affected by this policy, you are encouraged to visit Guest Relations to obtain a list of rides you can safely ride. Your Rider Access Form will provide information for our Team Member to help accommodate you.

RIDE SAFELY

While all amusement attractions have associated risks, certain individuals are at increased risk for injury from these attractions. Carefully evaluate each attraction to determine if you or members of your party can safely participate. We reserve the right to deny access to a ride to anyone who we feel may not be able to safely experience the ride or may be a hazard to other Riders.

A Safety Guide sign is posted at every ride entrance and Alternate Access entrance. These signs provide height requirements, health restrictions, ride ratings, ride accessibility, and special instructions regarding the ride. Please review these signs prior to accessing the ride and follow all instructions provided.

In general, all Guests should be in good health and free from any conditions, known or unknown, that might be aggravated by riding. If you have any doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Relations. Remember, if you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE.**

Generally, Guests must have the ability to brace themselves upright in the seat and support their head and neck during the ride movements. Guests using wheelchairs will have to transfer from their wheelchair to the ride unit by themselves or assisted by a member of their party in order to be able to ride. You should plan your visit with someone who can physically help you when necessary.

As a Guest, you are responsible for your own safety. Please read this Guide and all instructional signage before riding. Listen to and follow all operator instructions. Any person who intentionally removes a safety restraint, violates a park safety policy, or appears to be under the influence of alcohol or chemical intoxicants will be removed from the park without refund. **FOR YOUR SAFETY, DO NOT ENTER AN UNAUTHORIZED AREA FOR ANY REASON.** You may be seriously injured if you enter an unauthorized area.

Before riding, please note all safety warnings for each ride. In general:

- Follow all proper Rider positioning until the ride comes to a complete stop.
- All restraint systems, including lap bars, shoulder harnesses, and seatbelts, must be positioned, fastened, and tightened at all times.
- Due to the nature of our rides, backpacks, purses, electronics, stuffed animals, jewelry, and other loose items are not permitted on most rides. Glasses must be secured. Smaller items may be secured in cargo pockets or waist packs as long as they do not interfere with the restraint system. In addition, smaller items may be left in a locker or with a non-Rider. Six Flags America is not responsible for lost or stolen items. You are responsible for your personal property.
- Due to the nature of our rides, picture taking, cell phone, or electronic usage while riding is prohibited on most rides.
- Keep all parts of your body inside the ride unit at all times.
- Shirt, shoes, and shorts/pants are required on most amusement park rides.
- Finish food and drink before boarding.
- Smoking, including e-cigarettes, is not permitted in Six Flags America.

RIDE RATING SYSTEM

A Ride Rating System has been designed which provides a scale for rating the thrill factor of each ride. The intent is to provide a scale to Guide park Guests in determining which attractions to ride based on their own experience level, physical condition, and abilities.

Each ride/attraction is placed into one of five categories:

CATEGORY	DESCRIPTION
Low Thrill Rides	 Rides that are generally calm and gentle in nature.
Mild Thrill Rides	 Rides that generally have low speeds with gentle motion and braking. Rides have smooth transitions with some changes in elevation and speed.
Moderate Thrill Rides	 Rides that generally have low to medium speeds and/or heights with moderate motion and braking. Riders may encounter unexpected changes in direction and/or speed during portions of the ride.
High Thrill Rides	 Rides that generally have medium to high speeds and/or heights with moderate to rapid braking. Riders may encounter unexpected changes in speed, direction, and/or elevation.
Aggressive Thrill Rides	 Rides that generally have one or more of the following: high speeds and/or heights, aggressive and unexpected forces, and rapid directional or elevation change. Riders will encounter many unexpected rapid changes in speed, direction, and/or elevation.

KEY TO SYMBOLS

These symbols, along with the ride ratings, are used to define our rides on the following pages.

	Ambulatory
	Accommodates wheelchair
	Transferable
	Must be accompanied by Supervising Companion of proper height to ride
	Must be accompanied by a child to ride/participate
	Must be at least this height to ride
	Maximum speed of ride
	Life jacket is required
	Cannot be any taller than this to ride/participate
	Maximum height of ride
	Maximum water depth
	Prohibited for Guests with back trouble
	Prohibited for Guests with heart trouble or high blood pressure
	Prohibited for Guests with neck trouble
	Prohibited for pregnant Guests
	Prohibited for Guests who have had recent surgery

ACCESS SYMBOLS

Symbols indicate boarding procedures for each ride and are defined below.

This symbol is used to identify rides where Guests may remain in their wheelchair: Capital Railways; Carousel.

This symbol identifies rides that can accommodate Guests who are able to transfer from the wheelchair to the ride unit by themselves or assisted by a member of their party.

This symbol identifies rides where Guests must be able to walk independently or be assisted by a member of their party.

DEFINITIONS

Every ride entrance lists height requirements and special instructions regarding the ride. Six Flags America uses the following terms:

Ability to Hold On or Brace: Ability to use one's arms to maintain a grasp on an assist bar and support one's body during normal and emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Hand-held Infant: Hand-held infants are children who are unable to independently walk or maintain seated postural control and will only be able to ride the following rides with a Supervising Companion: Capital Railways; Carousel; Buccaneer Beach; Hurricane Bay; Wahoo River; Paradise Lagoon. Hand-held infants and their Supervising Companion may also enjoy Prop Warehouse, but may not participate on the elevated sections of the attractions.

Supervising Companion: A Supervising Companion is someone who meets all the requirements to ride the ride themselves, who is at least 54" in height, and demonstrates appropriate observed behavior. Supervising Companions are responsible for ensuring that the accompanied Rider remains seated properly where applicable and follows all rules and regulations. The Supervising Companion must be seated in the same seat (row) as the Rider who needs accompaniment and can accompany the number of Riders for which the seat is designed. For example, if a seat is designed for three people, the Supervising Companion can accompany two Riders.

HEALTH RESTRICTIONS

Each ride is evaluated against five primary health restrictions. These restrictions are:

- Back Trouble
- Heart Trouble/High Blood Pressure
- Neck Trouble
- Pregnancy
- Recent Surgery

If you are in doubt about your ability to safely experience a ride or would like more information, please review the information for each attraction in this Guest Accessibility Guide, or review the Safety Guide and all warning signs posted at each ride entrance and Alternate Access Entrances.

PREGNANCY

Guests who know or believe they may be pregnant should follow all rules, guidelines, and restrictions listed for each ride. Those who are pregnant should not ride a ride that specifically lists pregnancy as a Rider restriction. Please closely review all rules and guidelines at the entrance of each ride.

Guests who are pregnant may ride: Capital Railways; Carousel; French Quarters Flyers; and participate in: Paradise Lagoon; Buccaneer Beach; Wahoo River; Hurricane Bay.

HEIGHT REQUIREMENTS

Height requirements and specific instructions are posted at the entrance to each attraction.

To accurately measure Guests, a height measuring device may be used. This device may come into contact with the Guest's head for a brief period.

For the safety of Guests, a shoe which does not contribute excessively to the Guest's height is required. For example, a Guest is not permitted to wear platform shoes to help meet a height requirement. Six Flags America reserves the right to ask that shoes be removed to ensure that a Guest's height is not being artificially enhanced or manipulated.

In Hurricane Harbor, height measurements are taken in bare feet.

ATTRACTION ACCESSIBILITY PROGRAM

We are proud of our reputation for accommodating Guests with disabilities through our Attraction Accessibility Program. To provide equal access for all Guests, we have developed a program which allows Guests with mobility restrictions or cognitive impairment to access attractions. Information about where Guests access the ride is posted on each attraction's Safety Guide sign. All Guests are required to meet all riding requirements for every attraction, including height and health restrictions in order to safely ride/participate.

The Guest with a mobility restriction or cognitive impairment should visit Guest Relations upon their arrival at the park to express their inability to wait in the regular line. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Guest Services Associate will provide the details needed to participate in the program.

Guests with mobility restrictions or cognitive impairments who request reasonable accommodations are encouraged to obtain the IBCCES Accessibility Card (IAC) by registering at accessibilitycard.org or via the Accessibility Card mobile App. Once a Guest has filled out the online application and uploaded necessary documentation into a secure online portal, they will be able to access their digital Accessibility Card. Guests will present the IBCCES Accessibility Card to Guest Relations upon their arrival at the park to express their accommodation needs. Some questions are asked to ensure that the Guest has the required physical criteria in order to safely experience attractions. Following that conversation, the Team Member will provide the details needed to participate in the program.

Note: Only IBCCES can issue the IBCCES Accessibility Card and not Six Flags America.

CASTS & BRACES

Guests with casts and braces will be restricted from rides where the cast or brace will not fit inside the ride unit or where it will present a hazard to the Guest or others. Guests with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides and water slides. We suggest you delay your visit until the cast is removed. Casts and braces with exposed metal parts are not permitted on most slides in Hurricane Harbor.

The following chart displays the cast and brace rules for all rides and attractions.

- C** Must ride in a chariot
- F** Cast/Brace must fit safely in the ride unit
- O** Not permitted to participate on elevated activity area
- Y** May ride with the condition
- Z** Participation or water depth may be restricted if necessary

PROSTHESES

Guests with any type of prosthesis should avoid the following rides: BATWING™; Big Easy Speedway; Firebird, Flying Carousel; Great Chase; HARLEY QUINN™ Spinsanity; High Seas; Pirates Flight; QuantumCanyon Rapids; Ragin Cajun; Riddle Me This; Shipwreck Falls; SkyWinder; SteamWhirler; SUPERMAN™: Ride of Steel; *Sylverster's* Pounce and Bounce; THE JOKER's™ Jinx; THE PENGUIN's™ Blizzard River; Voodoo Drop; WONDER WOMAN™ Lasso of Truth unless they can ensure the device is properly secured and will remain in place during the ride. Guests must also be able to maintain proper riding posture. Prosthetic devices with exposed metal parts are prohibited on most attractions. Guests are encouraged to visit designated park locations for assistance before riding to ensure a safe experience.

Guests with prostheses are advised to consult with the Supervisory Team for guidance during their visit.

For certain rides, manufacturers may require documentation from the prosthetic device's manufacturer confirming it is designed to withstand high-speed roller coaster forces of up to 68 mph and G-forces between 1 to 5 Gs, with sufficient safety measures in place.

RIDE DEVICES

Guests with disabilities may be eligible to ride select attractions using a body harness provided by the park. Guests should visit designated park locations for assistance and to determine eligibility.

For safety reasons, certain attractions may require the removal of medical devices or prosthetics that are not securely fastened to the Rider's body. These devices may interfere with safety restraints, prevent proper riding posture, or pose hazards to the Guest or others.

On rides equipped with removable seats, Guests using wheelchairs may transfer directly to the ride vehicle. Ride attendants and Guest service staff are available to assist with questions or specific requirements regarding harnesses, mobility aids, or prosthetic devices.

Safety is the park's highest priority. To ensure an enjoyable and safe experience, Guests who do not meet specific Rider requirements, including those related to harnesses and mobility aids, may be restricted from participating.

Body harnesses, when requested, allow certain Guests with disabilities the ability to ride if they meet the ride criteria. The following rides are equipped with a body harness: All Rides, with the exception of water rides/slides; Capital Railways; Carousel.

For additional guidance, Guests are encouraged to consult the park Guide or speak with a Ride Attendant or Guest Relations team member.

ADDITIONAL INFORMATION

Our goal is to make Six Flags America as enjoyable and barrier-free as practical. Listed below are some of the services we offer. Please feel free to suggest areas in which we might improve in the future.

Braille & Large Print Versions

Print versions of the Park Guide and Guest Accessibility Guide are available at Guest Relations. Braille and large print versions are also available. There are a limited number of print Guides which are obtainable on a first-come, first-served basis.

Family Services

A space for nursing mothers is available at First Aid Main Street. Baby changing areas and a Companion restroom can be found in most restrooms. Please feel free to ask a Team Member/Associate for directions to these locations or review a park map.

First Aid

Our First Aid Building, located on Main Street, is staffed from park open to park close. Medical equipment storage and refrigeration for Guests with medication is offered at First Aid. In addition, a First Aid Building is located in Hurricane Harbor next to Hurricane Bay. This location is open during Hurricane Harbor operating hours.

Interpretive Services

If you require American Sign Language (ASL) interpreting services, we can provide them with at least seven days advance notice for live show venues, and/or to accompany you for the day. Additionally, show scripts or score sheets can also be requested at each venue. To arrange ASL services, please email guestrelations@sixflags.com or call Guest Relations at 301.249.1500 ext.7093127 Monday through Friday, 9am – 5pm.

Parking

Accessible parking is available on a first-come, first-served basis within the main parking lots of the park. When you arrive at the parking toll booths, ask a Team Member for instructions regarding where to proceed to the accessible parking lot. Both auto and van accessible spaces are provided. A valid disabled persons parking placard or license plate must be displayed at all times while parked in the designated accessible parking area. If the designated accessible parking area is full at the time of your arrival, members of your party may be dropped off at the main pick-up/drop-off area, near the main entrance to the park. Proper vehicle identification must be displayed. Security Officers on duty are authorized to ticket and/or tow vehicles that do not display proper identification. Please ask a Team Member for directions to additional parking areas.

Quiet Room

Six Flags America offers a Quiet Room located at First Aid, for family members or caregivers to take a break and reduce sensory stimulation.

Restrooms

Wheelchair accessible stalls are located at all restrooms except Lower Main Street Restrooms and Goldrush Restrooms. For your convenience, we also have a family restroom available Hurricane Harbor.

Rider Swap program

The Rider Swap program allows one adult to stay with non-Riders while the rest enjoy the ride. Upon their return, they can switch with the waiting adult, who can ride without joining the regular queue. For more information, visit Guest Services near Guest Relation.

Service Animals

Service animals are welcome at Six Flags America. Service animal is defined as a dog that has been individually trained to do work or perform tasks for a person with disabilities. Examples of such work or tasks include: guiding people who are blind; alerting people who are deaf; pulling a wheelchair; alerting and protecting a person who is having a seizure; reminding a person with mental illness to take prescribed medications; calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack; performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals.

Service animals must be house broken, controlled with a restraining device, display appropriate behavior at all times while on our property. Guests whose service animal demonstrates aggressive and/or inappropriate actions toward a Guest or Team Member will be directed to remove the animal from the park. There is a limit of one service animal per Guest.

Due to the nature of most rides, service animals must remain with a non-riding member of your party. We are not permitted to take control of your service animal. Service animals may be taken on Capital Railways and Carousel. Service animals must be leashed, under the owner's control, fit on the floor of the ride vehicle, and seated on the floor, not the ride seat. They may also attend the performances at all park venues. Service animals are not permitted in water attractions, wet decks, wading pools, or lazy rivers. They are permitted to walk through the park areas, including scare zones. Visit Guest Relations for more information. Guests may take advantage of our Rider Swap policy for staying with the service animal. Visit Guest Services for more information.

A Service Animal relief area is located in the grassy area next to Pirates Flight. Owners are responsible for disposing of their animal's waste.

Special Dietary Needs

Although outside food and beverages are not allowed in the park, individuals who have special diets or need items due to a medical condition may bring small coolers to accommodate such needs. Please visit Guest Services for more information.

Wheelchairs & Electric Convenience Vehicles

A limited supply of wheelchairs, electric convenience vehicles (ECV), and strollers are available for rent at Guest Relations. However, since wheelchairs, ECV's, and strollers are rented on a first-come, first-served basis and cannot be reserved in advance, we urge Guests to bring their own. Rentals are also available at the park while supplies last.

Wheelchairs, ECV's, and strollers may not be taken out of the park gates or to the parking lot. However, a park Associate will be happy to provide any assistance you may need at that time. For any Guest using a personal Segway, please stop by Guest Services prior to entering the park.

Guests Using Wheelchairs or ECVs

Guests who choose to use a wheelchair or ECV, we require a safe speed be maintained while traveling in the park. Wheelchairs and ECVs cannot be accommodated on most rides and attractions, with the exception of Capital Railways where one wheelchair can be accommodated. If your wheelchair can be safely accommodated on a ride, you are responsible for it being able to withstand the movement of the ride. Please refer to the individual ride and attraction descriptions in the back of this Guide for more specific information. For information on water wheelchairs in the waterpark, please see the Water Wheelchair and Pool Lifts section.

On most rides where Guests in wheelchairs can be accommodated, Guests will need to leave their wheelchairs to be seated. In most cases, a wheelchair may be left in a designated position on or near the ride platform or walkway near the ride. Almost every ride is wheelchair accessible. If an ECV has attachments to the vehicle which could impede with the operation of a lift or with safe lift ingress and egress, please transfer to a manual wheelchair. Applicable attachments would include canopies, antennae, umbrellas, awnings, etc. Please ask an Associate at each location for assistance.

If in doubt about your ability to safely experience a ride, we urge you to consult with our staff at Guest Relations. Six Flags America personnel are not trained in transferring Guests from wheelchairs to ride units and are not permitted to do so. You should plan your visit with someone who can physically help you when necessary.

EVACUATIONS

Evacuations may be required due to mechanical reasons, weather conditions, or a power interruption. If an evacuation is required, Riders may need to maneuver across catwalks, from the highest point of the ride, and down steeply inclined catwalks or steps. Ride units may also stop at the top of a lift or on the ride course. Certain evacuations may require Riders to use additional safety equipment during the process. Remain seated until given instructions. In Hurricane Harbor, Guests may be asked to evacuate pools as quickly as possible using stairs or ladders. If an evacuation from a ride/attraction is required, Riders requiring assistance during the ride evacuation may be escorted last in order to expedite the ride evacuation process. If so, you accept any risk due to delayed evacuation if we need to physically lift or lower you.

GUESTS OF LARGER SIZE

All restraint systems, including lap bars, shoulder harnesses, and seatbelts must be positioned and fastened properly to allow Guests to ride. Due to restraint system requirements, Guests of larger size (in terms of height, weight, and/or proportions) may not be accommodated on some of our rides.

Maximum and minimum weight limits can be found under the individual rides in this Guide and on the Rider Safety Guide Signs at the entrance to rides with restrictions.

If you are concerned whether or not you can be accommodated safely on a ride, you may enter the ride via the exit to ensure the restraints function properly prior to waiting in line. The rest of your party may wait for you outside the exit.

Test seats are located at the ride entrances of:
Superman; Firebird

The manufacturer requires a maximum Guest height on the following rides: BATWING™ 79"; FilmWorks 54"; Firebird 78"; SkyWinder 78"; SUPERMAN™: Ride of Steel 76"; *Sylvester's* Pounce N'Bounce 54"; Tea Party 52"; Voodoo Drop 76".

LOOSE ARTICLES

Most rides cannot accommodate loose articles including: jewelry; cell phones; hats; cameras; purses; backpacks; basketballs; umbrellas; beverage containers; electronic devices; etc. Items must be safely secured in cargo pockets, a waist pack, in a bin on the ride platform, in a locker, or with a non-Rider. Six Flags America is not responsible for lost, stolen, or damaged items.

Extra or bulky clothing, backpacks, and anything else that could potentially be between the Rider and the restraint will not be allowed. The restraint mechanism must be secured snugly against the Rider's body.

For safety reasons, cell phone usage, taking pictures, and filming on rides are prohibited.

Glasses must be secured on all rides

Hearing devices and other electronic devices may be damaged by water at water rides and attractions. Please take necessary precautions to protect hearing devices on all rides. Sensory headphones or helmets may be accommodated on select rides. Please see an Associate for more details.

Any non-compliance which results in damage or injury to a person or property will result in consequences up to and including prosecution.

LOST & FOUND

All items found at Six Flags America are turned in to Lost and Found. If you lose an item on a ride, we will search for the article as soon as possible. In order to keep the ride in operation, an immediate search may not be possible.

FOR YOUR SAFETY, DO NOT ENTER UNAUTHORIZED AREAS TO RETRIEVE LOST ARTICLES. You can be seriously injured if you enter an unauthorized area.

MAGNETIC FIELDS ON RIDES

Guests with medical devices sensitive to magnetic fields (pacemakers, hearing aids, etc.), should consider these factors when deciding to ride.

OXYGEN TANKS

Due to the dynamic nature of rides, portable oxygen tanks are only permitted on the following rides: Capital Railways; Carousel. The tank must fit safely in the ride unit and not interfere with the ride restraint system. For your convenience, the park's First Aid stations will be able to appropriately store your additional oxygen tanks during your visit.

Many rides can accommodate smaller personal oxygen equipment. Personal oxygen equipment that can be secured around the waist, or with a strap that can be worn over the shoulder of one arm and under the other arm, may be permitted as long as the contents of the equipment housing can be contained. The equipment must allow the restraint mechanism to be secured snugly against the Rider's body. The equipment must not prevent Riders from properly sitting in the ride unit with their back and shoulders against the seat back. At no time may the equipment be between the Rider and the seat or the restraint. Riders must be free to hold on during the ride; therefore, nothing may be in their hands while riding.

STROBE LIGHTING & SPECIAL EFFECTS

Many attractions utilize special effects, including, but not limited to: haze and other atmospheric effects; scents; areas of low lighting; loud music; sound effects; strobe lighting; other specialty lighting. Guests with medical conditions that may be impacted by these special effects are advised not to participate in these attractions.

PROPER ATTIRE

For the safety and enjoyment of our guests, everyone is to adhere to proper dress attire, as most rides require each Guest ride with shirts, shorts/pants, and shoes. Loose clothing (including scarves and other free-flowing clothing) must be fully secured or removed to prevent any interference with the ride restraint system. Loose clothing (including scarves, ponchos, and other free-flowing clothing), must be significantly secured or removed to prevent any interference with the ride restraint system. Loose fitting shoes may only be removed before riding: BATWING™; Firebird; Flying Carousel; HARLEY QUINN™ Spinsanity; SteamWhirler; SkyWinder; Voodoo Drop; WONDER WOMAN™ Lasso if Truth.

Swimwear is not permitted on rides outside of Hurricane Harbor. Swimwear is required to be appropriate. Thong or transparent clothing is not permitted.

RIDER CRITERIA

Our Attraction Accessibility Program is designed to allow Guests to participate in the enjoyment of our attractions as much as possible. The program was developed by analyzing the physical and mental attributes required to safely ride each attraction. It is our policy to allow anyone to ride who meets all these requirements and is not a hazard to themselves or others. We continue to evaluate and update our Attraction Accessibility Program as necessary.

The evaluation of each attraction considered the following criteria:

Independent seated postural.

The Guest must have the body and spinal control to sit upright without the aid of other people or devices. The Guest must also have sufficient muscle control to support their head, neck, and upper torso during the course of the ride, including the dynamic motion of the ride. Certain ride units such as carousel horses require the ability to form a saddle posture with the Guest's thighs.

Appropriate center of gravity.

The Guest's body must have the appropriate weight distribution for that ride.

Ability to hold on with one functioning arm.

Guests must have one functioning arm that exhibits good grip control, the ability to brace, and is strong enough to allow the Guest to maintain proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to hold on with two functioning arms.

Guests must have two functioning arms that exhibit good grip control, the ability to brace, and are strong enough to allow the Guest to maintain the proper riding position throughout the duration of the ride. A functioning arm may be a natural arm or a prosthesis which can be used for gripping and bracing. Any arm prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with one functioning leg.

Guests must have one functioning leg to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Ability to brace self with two functioning legs.

Guests must have two functioning legs to be used for bracing the body during the course of the ride. A functioning leg may be a natural leg or a prosthesis used for bracing the body during the course of participation and maintaining balance when entering and exiting a ride unit. Any leg prosthesis must remain properly secured under the dynamic forces of the ride. Due to manufacturer requirements, some rides may exclude prostheses.

Minimum of two functioning extremities.

Guests must have a minimum of two functioning extremities (two legs, two arms, or one arm and one leg) to brace themselves during the ride and assist in entering and exiting the ride unit.

Minimum of three functioning extremities.

Guests must have a minimum of three functioning extremities (two legs and one arm or two arms and one leg) to brace themselves (with tripod bracing) during the ride and assist in entering and exiting the ride unit.

Minimum of four functioning extremities.

Guests must have four functioning extremities (two legs and two arms) to brace themselves during the ride and assist in entering and exiting the ride unit.

Ability to enter/exit ride within specified parameters without endangering self or others.

Guests must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include special arrangements such as entering through the Alternate Access Entrance or having someone aid in boarding. For the safety of our Team Members and Guests, Associates are instructed not to perform any lifting of Guests.

Appropriate observed behavior:

Guest demonstrates appropriate observed behavior indicating a willingness and ability to participate and/or follow Guest requirements. Appropriate observed behavior may include, but not be limited to, maintaining proper riding position, attention and compliance to safety instructions, proper use of all ride safety equipment, and willingness to participate.

Guests have a duty to:

- Exercise good judgment
- Act in a responsible manner while using amusement rides
- Not participate while under the influence of alcohol or drugs
- Properly use all ride safety equipment provided

SIX FLAGS AMERICA RIDE DESCRIPTIONS

The following descriptions are designed to give you information on the type of actions caused by various rides. Each of the following attractions will identify the restrictions according to the criteria itemized above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriate observed behavior, and the ability to enter and exit the ride safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each ride.

BATWING™

*Guests must be between 54" tall **and** 79" tall to ride.*

Maximum Weight per Rider – 265 lbs.

A high-speed, flying, looping roller coaster that turns Riders upside down multiple times. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder vest with a between-the-legs lap bar secures each Rider across the chest, thighs, and pelvis. Additional padding constrains both legs across the shins. Feet must be below the shin bar at all times while riding. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm with a hand and two functioning legs with feet. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the guest has remaining leg and arm residual limbs to be secured by the harness.

Rider Access: Alternate Access is available at THE FLASH™ Pass Entrance. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into the seat.

Big Easy Speedway

Guests must be at least 58" tall to drive **or** 40" tall to ride

This is a drive yourself go-kart ride where Guests drive a go-kart around a designated track.

Restraint System: A seat belt secures each Rider across the upper body. Passenger must sit in the passenger seat unless they meet the Rider requirements for the Driver.

Rider Criteria: Driver – Drivers must have two functioning arms and two functioning legs. Guests with: a cervical collar; neck brace; broken collarbone; full arm cast; braced arm cast; full leg cast are not permitted to ride. Driver must exhibit sufficient visual acuity to operate the car safely. **Passenger** – Passengers must have two functioning arms and sufficient lower extremities to ensure the ride restraint system adequately restrains them.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps on their own or with the assistance of a Companion, and be capable of stepping down into the ride unit.

Capital Railways

Guests must be at least 42" tall to ride alone **or** be accompanied by a Supervising Companion. Guests less than 42" tall must sit on the inside.

A family ride that moves around a track with gentle turns.

Rider Criteria: Guests who do not have independent seated postural control, appropriate observed behavior, and hand-held infants must ride in the center of the bench with a Supervising Companion.

Rider Access: Alternate Access is available at the ride entrance. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up into the ride unit.

Carousel 1

Guests must be at least 42" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants must ride in a chariot.

A carousel ride which features animals — both stationary and moving up and down — and chariot seating mounted on a circular platform that rotates.

Rider Criteria: Guests must have at least one functioning arm and must have the ability to straddle the ride unit. Guests unable to straddle the ride unit or that do not have at least one functioning arm must be seated in a chariot unit. Guests unable to maintain seated postural control or demonstrate appropriate observed behavior must ride with a Supervising Companion and sit in the chariot.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up onto a platform. Service animals must be leashed and under the owner's control, fit on the floor of the ride vehicle, are permitted to ride on the ride platform or chariots.

Cyclone 3

Guests must be at least 48" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.

Maximum Weight per Rider – 510 lbs.

Rotating cars are mounted on counter-rotating arms, which produces strong accelerations and side-to-side movement, changing force and direction rapidly.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the ride unit may shift. Do not use the ride restraints for support as they will shift.

ElectroDerby 4

Guests must be at least 48" tall to drive **or** 42" tall to be a passenger **and** accompanied by a Supervising Companion.

A bumper car ride where Riders drive cars one way around a circular track. Riders will experience strong side-to-side movement and rapidly changing direction and forces.

Restraint System: An individual shoulder strap is positioned across the chest and under the arm of each Rider. A shared lap bar is positioned above the laps of all Riders in the row.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, or cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a companion, and be capable of stepping up and over the side of the ride unit. Please use caution, as the ride unit may shift when entering and exiting.

WARNING: This ride contains strobe lighting.

Elmer's Aaround the World in 80 seconds 1

Guests must be between 36" **and** 54" tall **or** under 36" **and** accompanied by Guest between 36" – 54".

A circular ride with some elevation.

Restraint System: A shared lap bar secures all Riders in the row. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride

Rider Access: Alternate Access is mainstreamed via the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

Firebird

Guests must be between 54" **and** 78" tall to ride.

A high-speed, floorless, looping roller coaster that turns Riders upside down. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size. A test seat is located at the ride entrance that can be used to evaluate proper fit and comfort prior to waiting in line.

Rider Criteria: Guests must have a minimum of one functioning arm that includes a hand, and two legs. Two functioning arms including hands are sufficient if the Guest has a normal center of gravity and sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Riders whose legs are paralyzed may ride. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride. Alternatively, guests with certain amputations may be able to ride with the use of a separate full body harness provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. Leg prostheses are not permitted.

Rider Access: Alternate Access is available at the ride Flash Pass Entrance. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat.

Flying Carousel

Guests must be at least 48" tall to ride.

Chair swing ride with free-hanging seats suspended from an elevated, rotating, and slanting tower. Riders will rotate in a circular motion as the tower begins to rise.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Leg casts are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up into the ride unit.

Foghorn Leghorn's Tinseltown Train 1

Guests must be at least 36" tall to ride alone **or** accompanied by a Supervising Companion. Hand-held infants are not permitted.

Riders board a miniature train.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests who do not have independent seated postural control and appropriate observed behavior must ride with a Supervising Companion

Rider Access: Alternate Access is mainstreamed via the ride entrance. Riders will have to transfer into the seat, on their own or with the assistance of a Companion.

French Quarter Flyers 3

Guests must be at least 44" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.

Maximum Weight per Car – 340 lbs.

Guests ride in suspended cars that rotate in a circle. Once the ride's speed increases, Riders use a fin on the front of the car to steer the car higher or lower.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis. The smaller Rider must sit on the inside seat.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar or neck brace are not permitted to ride. Guests who do not demonstrate appropriate observed behavior must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting.

Great Chase ▲ 3

Guests must be at least 42" tall **or** accompanied by a Supervising Companion.

A junior steel roller coaster with mild drops, bumps, and turns. Riders will experience changes in speed and direction, weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or any leg cast (foot, lower, full) are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please do not use the ride restraints for support while entering and exiting, as they will shift.

HARLEY QUINN™ Spinsanity ◆ 5

Guests must be at least 52" tall to ride.

A thrill ride that swings to the height of 150 feet in a pendulum motion while spinning in a clockwise rotation. Riders will experience changes in direction and elevation as well as moments of weightlessness while aboard the ride.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size

Rider Criteria: Guest must have arms that extend at a minimum to the elbow and non-prosthetic functioning hand on one of the two arms. Guest must have sufficient lower extremities to ensure the ride restraint system adequately restrains them. Both legs must include the knee. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness, provided the guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Relations to determine if they are eligible to ride using the full body harness. Guests with any upper extremity prosthesis must ensure the device is properly secured or removed prior to riding. All prostheses are not permitted.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat.

High Seas 3

Guests must be at least 48" tall to ride alone **or** 42" tall **and** accompanied by a Supervising Companion.

A ship ride that swings in a pendulum motion. Riders will experience weightlessness and rapidly changing forces and direction.

Restraint System: A shared lap bar secures all Riders in the row.

Rider Criteria: Guests must have a minimum of one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is mainstreamed via the ride entrance. This attraction is wheelchair accessible.

Looney Tunes Prop Warehouse 2

Guests must be less than 54" tall **or** accompanied by a Guest under 54".

A soft children's play area with air-propelled foam balls.

Minutemen Motors 2

Guests must be at least 48" tall to drive **or** accompanied by a Supervising Companion to ride. Hand-held infants are not permitted.

An antique-styled car ride that slowly travels through a scenic journey on a designated track.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning arm or one functioning leg. Guests must also have the ability to maintain seated postural control and demonstrate appropriate observed behavior. Guests who do not meet these requirements must be accompanied by a Supervising Companion.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and into the seat of the ride unit.

Pepe Le Pew's Tea Party 2

Guests must be between 36" **and** 52" tall to ride.

A kiddie tea cup spinning ride.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have at least one functioning arm or one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is mainstreamed via the ride entrance. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up into the ride unit.

Professor Screamore's SkyWinder 5

Guests must be between 52" tall **and** 76" tall to ride.

A high-speed suspended steel roller coaster which turns Riders upside down multiple times. Riders will experience weightlessness and rapid movement from side-to-side.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat.

QuantumCanyon Rapids 4

Guests must be at least 42" tall to ride alone **or** 38" tall **and** accompanied by a Supervising Companion.

A family water ride where Riders travel in rafts along a man-made river full of rapids, geysers, canyons, and waterfalls. Rafts float and bounce down high-speed rapids, often rotating rapidly after impacting with the bank of the river. Riders will get wet.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, or braced arm cast are not permitted to ride.

Rider Access: Alternate Access is mainstreamed via the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Please use caution, as the ride unit may shift when entering and exiting. Watch your step, as the ride unit may be slippery and wet.

Ragin Cajun 4

Guests must be at least 54" tall to ride alone **or** 48" tall **and** accompanied by a Supervising Companion at least 63" tall.

Maximum Weight per Car – 630 lbs.

A steel roller coaster with cars that traverse a steel track while freely rotating 360 degrees. Riders will experience changes in speed and direction, moments of weightlessness, and rapid movements from side-to-side.

Restraint System: A shared lap bar and seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

Riddle Me This

Guests must be at least 48" to ride.

Guests stand in a high-speed circular ride unit, which rises to a tilted position while rotating. Riders will experience strong accelerations and centrifugal forces.

Restraint System: A safety chain encapsulates the Riders within their stall. A door further encloses all Riders into the ride unit.

Rider Criteria: Guests must have a minimum of one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride entrance. Riders will have to take several steps up to the ride unit and remain standing during the entire cycle.

Roar

Guests must be at least 48" tall to ride.

A high-speed wooden roller coaster with high-speed airtime humps, quick turns, and enclosed tunnels.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

Shipwreck Falls 4

Guest must be at least 42" tall ride alone **or** 36" tall **and** accompanied by a Supervising Companion

This is a water shoot-the-chutes ride. Riders may get wet. Riders will be seated in a boat and brace for a plunge down a chute and a splash of water.

Restraint System: A shared lap bar secures all Riders in the row.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is mainstreamed via the Flash Pass Entrance. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. Watch your step, as the ride unit may be slippery and wet.

SteamWhirler 4

Guests must be at least 42" tall to ride

Maximum Weight per Seat – 300 lbs.

Maximum Weight per Section – 1,200 lbs.

A family thrill ride where gondolas rotate on arms around a horizontal axis in circular motion while rotating clockwise around the center hub. Riders will experience weightlessness and rapidly changing forces and directions.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate Riders of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Alternatively, Guests with certain amputations may be able to ride with the use of a separate full body harness provided the Guest has remaining leg and arm residual limbs to be secured by the harness. Guests should check with Guest Services to determine if they are eligible to ride using the full body harness.

Rider Criteria: Guests must have a minimum of one functioning arm (excluding prosthesis) and one functioning leg. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into the seat.

Taz's Filmworks 1

Guests must be between 36" **and** 54" tall to ride.

A child-size chair swing with free-hanging seats suspended from a gently rotating tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of elevating themselves up into a suspended seat. Please use caution, as the ride unit may shift when entering and exiting.

Tea Cups 3

Guests must be at least 42" tall to ride alone **or** be accompanied by a Supervising Companion. Hand-held infants are not permitted.

This is a family ride with quick, circulating motion.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis. A door further encloses the ride unit.

Rider Criteria: Guests must have a minimum of one functioning arm with a hand (excluding prosthesis) and one functioning leg with a foot (including prosthesis). Guests with a cervical collar, neck brace, broken collarbone, or braced arm cast are not permitted to ride. Full arm or full leg casts must fit safely inside the ride unit.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion to access the ride unit. This includes an elevated step onto the platform.

THE JOKER's™ Jinx 5

Guests must be at least 54" tall to ride.

An outdoor steel roller coaster that launches Riders to 60 MPH and turns Riders upside down four times. Riders will experience high speeds, weightlessness, and rapid movements from side-to-side.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Additional padding constrains both legs across the ankles. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size.

Rider Criteria: Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or any leg cast (foot, lower, full) are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping down into the ride unit.

WARNING: This ride utilizes magnetic systems.

THE PENGUIN's™ Blizzard River 4

Guests must be at least 48" tall to ride alone **or** 36" tall **and** accompanied by a Supervising Companion.

Maximum Weight per Raft – 800 lbs.

A family spinning raft water ride where Riders travel up in rafts and descend down through a course. Riders will experience dips, twists, and spins. Riders will get wet.

Restraint System: An individual seatbelt secures each Rider across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is mainstreamed via the ride entrance. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

Voodoo Drop 4

Guests must be between 48" **and** 76" tall to ride.

A free-fall ride that lifts Riders to the top of a structure and drops them. Riders will experience weightlessness and rapidly changing forces.

Restraint System: A shoulder harness with a between-the-legs safety belt secures each Rider over the head and across the chest. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of one functioning arm and two functioning legs. Guests with a cervical collar, neck brace, or broken collarbone are not permitted to ride. Casts are not permitted on this ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion.

Wild One 5

Guests must be at least 48" tall to ride.

A high-speed, wooden roller coaster with a combination of banked turns and airtime bumps.

Restraint System: An individual lap bar and seatbelt secures each Rider across the thighs and pelvis. Due to the nature of the restraint, this ride may not accommodate guests of a larger size.

Rider Criteria: Guests must have a minimum of three functioning extremities. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Guests will have to transfer into the seat, on their own or with the assistance of a Companion. A transfer device is available upon request which may assist a Guest out of a wheelchair and into the ride unit.

WONDER WOMAN™ Lasso of Truth 4

Guests must be at least 44" tall to ride.

A chair swing thrill ride with free-hanging seats suspended from an elevated and rotating gondola. Riders will rotate in a circular motion as the gondola ascends and descends the tower.

Restraint System: An individual lap bar and a between-the-legs safety belt secures each Rider. An additional individual seatbelt is positioned across the lap of each Rider. Due to the nature of the restraint, this ride may not accommodate Guests of a larger size

Rider Criteria: Guests must have a minimum of four functioning extremities. Two functioning arms are sufficient if the guest has a normal center of gravity and the lower extremities are sufficiently strong to maintain proper riding posture under the dynamic conditions of the ride. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Alternate access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion and be capable of elevating themselves up into the seat. Please use caution, as the ride unit may shift when entering and exiting

Yosemite Sam's Hollywood Flight School 2

Guests must be between 36" **and** 54" tall to ride.

A slow-moving plane ride that goes up and down as the ride rotates around in a circle.

Restraint System: A shared seatbelt secures all Riders in the row across the thighs and pelvis.

Rider Criteria: Guests must have a minimum of one functioning arm and one functioning leg. Guests with a cervical collar, neck brace, or full leg cast are not permitted to ride.

Rider Access: Alternate Access is available at the ride exit. Riders will have to take several steps, on their own or with the assistance of a Companion, and be capable of stepping up and over the side of the ride unit applicable to attraction.

HURRICANE HARBOR WATERPARK

Each attraction is placed into one of five categories:

CATEGORY	DESCRIPTION
Low Thrill Rides	 <p>This is a low speed and/or shallow water attraction.</p>
Mild Thrill Rides	 <p>This is a low to medium speed attraction, and/or water depth to 48 inches. Some Rider control, maneuvering, and/or swimming skills required.</p>
Moderate Thrill Rides	 <p>This is a medium speed attraction. Height and water depth may vary Moderate or unexpected forces can be generated during the ride. This attraction may require Rider control and/or strong swimming skills. Physical activity may be strenuous.</p>
High Thrill Rides	 <p>This is a fast paced ride experience. Riders will encounter changes in speed, direction, elevation, strong water currents, and/or depth of water, some of which is unexpected. This attraction requires Rider body control and strong swimming skills.</p>
Aggressive Thrill Rides	 <p>This is a high speed and/or deep water attraction with turbulent turns, drops, and/or strong water currents with changes in speed, direction, elevation, and/or deep water, which may be unexpected. This attraction requires Rider body control and swimming skills.</p>

Appropriate Attire

Appropriate swimwear is required. Thongs and transparent clothing are not permitted. We reserve the right to determine the appropriateness of swimwear. Guests wearing bathing attire with metal buttons, rivets, zippers, or snaps will not be permitted at any attraction. Contact lenses are not recommended. Guests requiring special accommodation should speak to a member of the Aquatics Supervisory Team.

Life Jackets

Life jackets are available for all Guests. Only U.S. Coast Guard approved life jackets are allowed as floatation devices. Life jackets are provided free of charge for Guests who require one.

In wave pools, life jackets are required for: Guests who are less than 52" tall in bare feet; participants with a history of seizures (or similar medical conditions); heart conditions; those who are inexperienced or non-swimmers. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Hurricane Bay.

In other attractions requiring life jackets, children who are less than 48" tall in bare feet or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42" tall must wear life jackets and be accompanied by Supervising Companions. This policy will be enforced at Wahoo River Paradise Lagoon.

Ongoing Lifeguard Training

In an ongoing effort to provide a safe and enjoyable waterpark experience for our Guests, Hurricane Harbor routinely utilizes training exercises to improve our lifeguards' skills and vigilance. These exercises will occur during normal operating hours and may consist of the following: submersible water manikins; the use of video surveillance equipment; internal and external audits; active/inactive water rescues and/or first aid scenarios.

Scales

Red light/green light scale systems are used at weight sensitive attractions. Guests who do not meet the weight requirement will not be permitted to ride. Scales are used at Halfpipe and RipQurl Blaster.

Swim Diapers

Guests who require a diaper are required to wear swim diapers or a diaper specifically designed for aquatic use.

Water Wheelchairs

Guests participating in a wave pool are permitted to use a personal wheelchair. Personal wheelchairs are permitted up to the seat's water depth. Guests utilizing wheelchairs will not be required to utilize a life jacket while in the wave pool only if their height exceeds 52". While using any wheelchair, Guests must not utilize the wheelchair's seatbelts while in the wave pool.

Motorized or electric personal wheelchairs will be permitted at Splash Waterfalls. Walkers, canes, or other assistive devices are permitted only at ankle depth in the following attractions: Buccaneer Beach; Hurricane Bay; Splash Waterfalls; Paradise Lagoon; Wahoo River. A pool lift is available at Paradise Lagoon.

During your visit, please speak to a member of our Aquatics Supervisory Team to obtain access to the water wheelchair or pool lift and for further accessibility information.

WATERPARK ATTRACTIONS

The following descriptions are designed to give you information on the types of actions caused by various attractions. Each of the following attractions will identify the restrictions according to the criteria outlined above. **In order to participate on most attractions, Guests must have seated postural control, appropriate center of gravity, appropriated observed behavior, and the ability to enter and exit the attraction safely.** Specific exceptions or qualifications to those four criteria will be noted in the information provided below. If you have been authorized for Alternate Access, follow the directions listed under each attraction. Please use caution when entering and exiting waterpark attractions as the surrounding areas may be slippery. Conveying devices such as tubes and rafts may be slippery and can shift during loading and unloading.

Bahama Blast 4

Guests must be at least 48" tall in bare feet **or** 42" tall in bare feet **and** accompanied by a Supervising Companion at least 54" tall in bare feet.

Maximum Weight per Tube – 800 lbs.

A thrilling tube slide where Riders twist and turn in an enclosed flume in near complete darkness before finishing in a 36" depth splash pool. Riders will experience high speeds and rapid movements from side-to-side.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, forearm cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Bamboo Chutes 1

Guests must be shorter than 54" tall in bare feet to ride.

A set of two children's body slides.

Rider Criteria: Guests must ride feet first. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, forearm cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride

Rider Access: Access to the attraction requires climbing a few steps. Riders will have to be capable of safely entering the slide, on their own or with the assistance of a Companion.

Buccaneer Beach 1

*Guests must be less than 54" tall in bare feet to ride **or** be accompanied by a child. Guests over 54" tall are not permitted on the slides.*

An interactive pool for children that features slides and other play elements. Maximum water depth is 10"

Rider Criteria: Guests are required to slide upright or lying feet first. Guests who do not have seated postural control or appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. Please use caution when entering and exiting as the area may be slippery.

Calypso Cannonballs 2

Guests must be at least 48" tall in bare feet to ride.

Two single Rider body slide that ends in a 4" runout. Maximum one Rider per slide.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the slides requires climbing a few steps. Riders will have to be capable of safely entering the slide, on their own or with the assistance of a Companion.

Halfpipe ▲ 3

Guests must be at least 48" tall in bare feet to ride.

Maximum Weight per Rider – 250 lbs.

Maximum Weight per Raft – 600 lbs.

Riders plunge 45' down and are sent up a halfpipe where they reverse direction.

Rider Criteria: Riders are required to maintain the proper riding position – sitting up straight, with their hands and legs inside the raft, holding on to the handles at all times. When there are two Riders, ensure the heavier guest sits on the back of the raft. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the raft, on their own or with the assistance of a Companion.

Hurricane Bay 4

Guests must be at least 52" tall in bare feet to ride. Guests who are less than 52" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers must wear a life jacket. Children who are less than 42" tall must wear life jackets **and** be accompanied by a Supervising Companion. A Supervising Companion may accompany up to two Guests.

A large wave pool with depths ranging from 1' – 5'. Waves are generated for 5 minutes on, and then 5 minutes off. Strenuous activity is required during wave action cycles which may require the ability to swim and which may result in fatigue. Exercise caution. Participants with a history of seizures — or heart or other serious medical conditions — should be supervised by someone who knows how to swim and how to provide emergency assistance.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held infants participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion.

Rider Access: Access is available via the zero depth entry. This attraction is wheelchair accessible, although the water level may not exceed the height of the seat on the chair.

Paradise Lagoon 2

Guests must be at least 53" tall in bare feet to ride.

A family pool/attraction for swimming and wading with water elements and features at various depths of water.

Rider Criteria: Guests unable to maintain seated postural control, have the ability to safely enter and exit the pool, or demonstrate appropriate observed behavior must be accompanied by a Supervising Companion. Hand-held infants participation or water depth may be restricted if necessary and must be accompanied by a Supervising Companion.

Rider Access: Access is available via the stairs or pool lift. Guests will have to transfer to the stairs, lift, on their own or with the assistance of a Companion. Please speak to a member of our Aquatics team to obtain access to the pool lift.

Paradise Plunge/Reef Runner

Guests must be at least 42" tall in bare feet to ride.

Maximum Weight per Rider – 250 lbs.

A complex of two separate slides with quick turns and sudden drops ending in a 42" deep catch pool.

Rider Criteria: Guests must remain seated in the tube facing forward and holding onto the handles. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

RipQurl Blaster

Guests must be at least 42" tall in bare feet to ride.

Minimum Weight per Rider – 110 lbs.

Maximum Weight per Rider – 300 lbs.

Maximum Weight per Raft – 400 lbs.

Water coaster which propels Rider's uphill using water jets. Riders participate in two person boats. Six inch water depth.

Rider Criteria: Guest must sit back against the raft with feet forward, holding onto handles at all times. Smaller guest must sit in front. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs with a tube. Riders will have to ascend the slide tower and be capable of safely entering the tube, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the tube may shift. The tube and surrounding area may also be slippery.

Note: A red light/green light scale is used at this attraction. Guests who exceed the weight requirements will not be permitted to ride.

Shark Attack 5

Guests must be at least 48" tall in bare feet to ride.

Maximum Weight per Rider – 300 lbs.

Two high-speed body slides with sudden drops designated for a single Rider. Slides end in a 3" run out.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests may not sit up in enclosed slides while riding. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the attraction requires climbing several flights of stairs. Riders will have to ascend the slide tower and be capable of safely entering the slide, on their own or with the assistance of a Companion. Please use caution when entering and exiting as the area may be slippery.

Splashwater Falls 2

Guests must be at least 36" tall in bare feet to ride Aquatube and at least 40" tall in bare feet to ride Pool Sider.

Maximum Weight for Aquatube – 200 lbs.

Maximum Weight for Pool Sider – 300 lbs.

A zero depth play structure with a host of wacky interactive activities including waterfalls, rotating water jets, and a giant tipping bucket.

Rider Criteria: Structure: Guests who cannot maintain seated postural control must be accompanied by a Supervising Companion. **Slides:** Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride

Rider Access: Access to the attraction requires climbing a few flights of stairs. Riders will have to be capable of safely entering the slide, on their own or with the assistance of a Companion.

Tornado 4

Guests must be at least 48" tall in bare feet to ride.

Maximum Weight per Tube – 700 lbs.

A thrilling tube slide that takes Riders through both open-air and darkened, enclosed flumes, along with giant oscillating funnels. Once momentum subsides in each funnel, the ride continues onward before finishing in an 18" depth runout. Riders will experience high speeds, weightlessness, and rapidly changing forces and direction.

Rider Criteria: Guests must be seated in a tube, facing forward, and firmly grasping the handles throughout the ride. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the tower requires climbing several flights of stairs, and ascending an incline with a tube. Riders need to ascend the slide tower and be capable of safely entering the tube on their own or with the assistance of a Companion.

Vortex Riptide 2

Guests must be at least 48" tall in bare feet to ride.

Two single Rider body slide that ends in a 4" runout. Maximum one Rider per slide.

Rider Criteria: Guests are required to lie down on their back, feet first, with arms crossed across their chest and legs crossed at the ankles. Guests must have two functioning arms and two functioning legs. Guests with a cervical collar, neck brace, broken collarbone, full arm cast, braced arm cast, or full leg cast are not permitted to ride. Lower body casts (foot, lower leg, etc.) are not permitted on this ride.

Rider Access: Access to the slides requires climbing a few steps. Riders will have to be capable of safely entering the slide, on their own or with the assistance of a Companion.

Wahoo River ▲ 3

Guests must be at least 36" tall in bare feet to ride **or** be accompanied by a Supervising Companion. Guests who are less than 48" tall in bare feet, participants with a history of seizures (or similar medical conditions), heart conditions, or those who are inexperienced or non-swimmers must wear a life jacket. A Supervising Companion may accompany up to two Guests.

A slow moving river tube ride/attraction.

Rider Criteria: Guests must be able to maintain independent seated postural control and must have appropriate observed behavior or be accompanied by a Supervising Companion. Guests must have a minimum of two functioning extremities or be accompanied by a Supervising Companion. Hand-held infants must be accompanied by a Supervising Companion. Guests with a cervical collar, neck brace, broken collarbone, braced arm cast, or full leg cast are not permitted to ride.

Rider Access: Access is available via the zero depth entry at Wahoo River. Riders will have to transfer to a tube, on their own or with the assistance of a Companion.

BOOFEST

This event is a special daytime Halloween family-fun event. Enjoy all the themed attractions and activities specially designed for kids. For more information on the event, attractions or services offered visit Guest Relations

FRIGHT FEST

Fright Fest at Six Flags America has extreme attractions that are designed to scare and startle. These attractions and the park in general will have areas of low lighting, strobe lighting, loud sound, and dense fog. Guests with respiratory sensitivities, history of seizures or epilepsy, sensitivities to latex, or sensitivities to loud music and sound effects are advised not to participate in these attractions.

Characters in our Fright Fest will not touch you; please do not touch them in any manner. Guests that do will be removed from the park without refund. Rowdy behavior and profanity are also causes for removal from the park. For safety reasons, Guests may not wear their own face paint, costumes, or masks.

Alternate Access may be available. Please visit Guest Relations for more information. Service animals are welcome to attend Fright Fest events. They are permitted to walk through the park areas, including scare zones. Please adhere to all posted and verbal warnings and directions.

WARNING

There are inherent risks in participating in any amusement attraction. If you choose to participate, you accept the risks and agree to do so responsibly. Read all important safety information prior to riding and obey all posted and verbal instructions. For your protection, each attraction is rated for its special features including height, speed, direction, and dynamic forces. You know your physical conditions and limitations, Six Flags America does not. If you suspect your health could be at risk, or you could aggravate any pre-existing condition, **do not ride!**

All restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned, fastened and tightened properly to allow Guests to ride.

Information in this Guide is subject to change.
